MOSO
world leading in bamboo
MOSO principle 1: sustainability

We believe that Moso bamboo is one of the most promising alternatives in the required shift to a sustainable economy. As one of the fastest growing, renewable resources in the world, it absorbs CO₂ in large quantities yet has hardwood properties, making it the ideal alternative to tropical hardwood. We value honesty, integrity and transparency; we therefore back up our sustainability claims with comprehensive testing reports and internationally respected certifications and ecolabels from independent, acknowledged institutions. We clearly communicate our best performing products in our Green Premium line. We are the only bamboo company with a full carbon footprint and LCA revealing that our 100% bamboo products are carbon neutral (or better) over their full life cycle. The use of MOSO products, especially in Green Premium, contributes to a higher score in the leading sustainable building certification systems LEED and BREEAM.
MOSO provides top quality products that meet the highest technical, functional and aesthetical requirements in Western markets. A key precondition for MOSO’s success has always been its control over the production process. As the most experienced player in the bamboo industry and with a professional organization established in China, we actively safeguard the quality of our products and provide a product guarantee of up to 30 years, and a fire safety performance up to class B1. Furthermore, our products are made in production facilities that are ISO 9001 and ISO 14001 certified and therefore comply with the most stringent norms with respect to quality, human health, safety and the environment. Through a strong distribution network MOSO can combine a huge product assortment – providing a bamboo solution for everyone – with local availability thus facilitating short lead times.
MOSO principle 3: innovation

Through continuous product development and process innovation MOSO is able to deliver bamboo solutions with superior performance in terms of technology (easy installation, better performance in use), costs (creating higher value for money), assortment (widest choice in line with the latest consumer trends), sustainability (lowest environmental impact and CO₂ emissions) and applicability (use in even the most demanding circumstances).

In our permanent strive for innovation we actively collaborate with several acknowledged research and normalisation institutes such as TU Delft, NEN and CEN. We only work with suppliers that share our values with respect to sustainability and product excellence: Bona for lacquers, Woca for oils and Dynea for adhesives.

unlimited solutions in bamboo
MOSO International was founded and has since then evolved to become the unchallenged, European market leader in the development of innovative and sustainable bamboo products for interior and exterior applications. The MOSO products can be divided into four product groups.

- **MOSO Bamboo Flooring**
- **MOSO Bamboo Panels & Veneer**
- **MOSO Bamboo Outdoor**
- **MOSO Unlimited Solutions**

Through its experience, innovative attitude and worldwide network, MOSO is recognised as the top global brand in bamboo products. There is no other company worldwide with an equal – and still expanding – broad assortment in high quality, bamboo products. MOSO products are permanently available from stock in various regions worldwide.

Follow the timeline for the milestones that have contributed to making the MOSO vision a reality.

**MOSO: world leading in bamboo**

### Barajas airport
**2001**
As the only bamboo supplier able to meet the most stringent, performance requirements, MOSO acquires the order to supply the bamboo for the largest bamboo project ever: 200,000m² bamboo ceiling boards for the Barajas International Airport in Madrid, designed by Richard Rogers.

### DMVP joint venture
**2002**
Together with a Chinese partner MOSO sets up a production plant totally focused on the production of bamboo veneer: DMVP. Until today DMVP is the only factory in the world specialized in this product.

### new MOSO office
**2004**
Continuous growth after its establishment requires MOSO to move to a new office with a spacious warehouse (Marowijne 43 in Zwaag, near Amsterdam).

### BMW dashboard
**2006**
Due to excellent and consistent product performance, MOSO was selected as the exclusive supplier of bamboo veneer for BMW’s dashboards, opening up a totally new industry for bamboo products.
FSC® certification 2008
Globally recognized as the best certification system for responsible wood production, FSC® is now also available for bamboo. As pioneer in the bamboo industry, MOSO is able to provide bamboo products with FSC® certification (FSC C002063).

unibamboo 2008
With Unibamboo MOSO has developed the first flexible bamboo flooring in the world. This innovative flooring product, patented by MOSO, combines the virtues of carpet / vinyl with the charm of bamboo.

MOSO China 2009
A new office was established near Hangzhou together with a workshop, to produce all MOSO sample materials.

bamboo outdoor 2010
MOSO launches Bamboo X-treme, the first outdoor bamboo decking product meeting the highest performance and durability requirements in Western markets. This is achieved due to the special density-thermo process, patented by MOSO.

CE marking 2008
The European Union demands products to comply with the highest quality requirements for which it uses CE labelling. MOSO acquired the CE marking for all of its flooring products in 2008.

Hong Kong 2008
Besides the office of MOSO China, a new office was established in Hong Kong to deal with direct exports from China to the customer.

Barcelona office 2009
MOSO opens up a new office in Barcelona and establishes MOSO Europe SLU, in order to better serve the Southern European and Latin American markets.

topbamboo 2010
With Topbamboo MOSO again shows its talent for product developments that are in line with the latest market trends. This new flooring product is very easy to install, economical, stable and available in many different colours and finishes.

green premium 2011
With the Green Premium label, MOSO launches a product line which is "extra green": available with FSC® certification and made with adhesives containing no added formaldehyde (E0 norm).
our vision:
“to become the world’s leading company in high quality bamboo solutions for durable indoor and outdoor applications”
MOSO bamboo flooring

Eleven different flooring types available in multiple variations in size, colour and style, which provide dozens of different bamboo flooring options for each market.

page 16

MOSO bamboo panels & veneer

design: Paul de Ruiter

tambour
Cupboard with sliding doors
Germany
design: Schaub Design

solid panel & veneer
Bossia kitchen
Madrid, Spain
design: Bossia

veneer
Guggenheim Museum
Bilbao, Spain
design: Cesar Caicoya - Idom Architects
With the introduction of the Outdoor Collection MOSO has developed a truly ecological and durable alternative for increasingly scarce and expensive tropical hardwood. MOSO uses a unique, patented process to alter the hardness, dimensional stability and durability to a level superior to the best, tropical hardwood species. Combining these superior performance features with the sustainability of bamboo sets Bamboo X-treme apart from virtually any other outdoor decorative product.
unlimited solutions

Besides the broad assortment of flooring, panels & veneer and outdoor products, MOSO is able to develop unique customised bamboo solutions for industrial clients that meet exceptionally high demands. Together with clients MOSO has co-created unique bamboo solutions for a whole range of industries including the furniture, automotive, kitchen, consumer goods, computer, and green building industry.
